**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 1 (currently amended): A method for controlling a cellular phone, the cellular phone  
5 comprising a memory and a clock, the method comprising:  
    (a) storing a time and a content of work executed at the time into the memory;  
    (b) taking statistics of each time of the work; and  
    (c) controlling a user interface of the cellular phone according to the statistics and  
        the time counted by the clock.
- 10 2 (original): The method of claim 1 wherein the content of work comprises turning on the  
cellular phone, turning off the cellular phone, dialing, sending messages, browsing  
homepages, downloading data from homepages, and showing remaining power of the  
cellular phone.
- 15 3 (original): The method of claim 1 further comprising stopping storing the time and the  
content of work executed at the time into the memory.
- 20 4 (original): The method of claim 1 further comprising stopping taking the statistics of  
each time of work.
- 5 (original): The method of claim 1 further comprising stopping controlling the cellular  
phone according to the statistics and the time counted by the clock.
- 25 6 (original): The method of claim 1 wherein step (c) is to control the cellular phone to  
generate a message according to the statistics and the time counted by the clock.

7 (original): The method of claim 6 wherein the message is a ringing tone.

8 (original): The method of claim 6 wherein the message is a text message.

5 9 (original): The method of claim 6 wherein the message is vibration.

10 (original): The method of claim 1 further comprising:

10 after a password of the cellular phone is changed for a period of time, comparing each  
time and content of work after the password was changed with the statistics on the  
time and the content of work before the password was changed; and  
if the time and the content of work after the password was changed do not  
substantially match the statistics on the time and the content of work before the  
password was changed, generating a message according to a call-out record of the  
cellular phone before the password was changed.

15

11 (original): The method of claim 1 wherein step (c) is to control the cellular phone  
when the clock of the cellular phone reaches the statistics on the time obtained in step  
(b).

20 12 (original): A cellular phone for implementing the method of claim 1.

13 (new): The method of claim 1 wherein controlling the user interface of the cellular  
phone comprises powering on the cellular phone at a specific time calculated  
according to the statistics taken and the time counted by the clock.

25

14 (new): The method of claim 1 wherein controlling the user interface of the cellular  
phone comprises providing the user with a reminder about a normally scheduled event  
at a specific time calculated according to the statistics taken and the time counted by

the clock.

15 (new): The method of claim 1 wherein controlling the user interface of the cellular  
phone comprises downloading email at a specific time calculated according to the  
5 statistics taken and the time counted by the clock.

16 (new): The method of claim 1 wherein controlling the user interface of the cellular  
phone comprises downloading predetermined website data at a specific time  
calculated according to the statistics taken and the time counted by the clock.
